Scores are 0–100 unless stated. Site health = share of crawled pages free of warning-level issues. Mobile speed = Google Lighthouse performance score of the homepage on a phone. Google visibility = tracked keywords where the site appears in the top 20 results. AI visibility = share of AI-engine answers that name the brand.

Verdict

Graza wins where its brand is the question and loses where the category is. AI answer engines name Graza in 26 of 38 answers to neutral olive-oil questions, ahead of Brightland (13) and Kosterina (12), and Google ranks it in the top 5 for its own product words (Sizzle, Drizzle, finishing olive oil). But it is not in Google's top 20 for 'best olive oil' (22,200 searches a month), 'extra virgin olive oil' (201,000) or even 'olive oil squeeze bottle', the format it made famous. The blog already ranks for big recipe and how-to searches, so the content engine works; what is missing is commercial category pages. The site is also slow on phones: the homepage scores 25/100 in Google's mobile Lighthouse test.

Do these three first

1. Create three buying-guide pages that answer 'best olive oil', 'best extra virgin olive oil' and 'olive oil squeeze bottle' directly: comparison table, origin and harvest facts, an FAQ block with schema, linked from the homepage and the top recipes
2. Cut the homepage's mobile load: compress and defer the hero media, audit third-party app scripts (reviews, pop-ups, upsell apps), preload the main image; target a mobile score of 60+
3. Fix the 4 broken internal links on the Friendsgiving and Gifting pages, and point the 19 near-identical collection pages (all, bottles, bundles, cans, cart upsells) at one canonical URL

1. Site health

150 pages crawled on 6 November 2026. 17 issue types found; warning-level issues affect at least 81 pages. Graza is a US direct-to-consumer olive oil brand on Shopify: single-origin Spanish extra virgin olive oil in squeeze bottles (Drizzle, Sizzle), refill cans, gift sets and a large recipe and cooking-education blog.

Severity	Issue	Pages
CRITICAL	Broken internal link	4
WARNING	Pages without a main heading	81
WARNING	Pages with no description	61
WARNING	Thin content	42
WARNING	Two URLs serve the same page	41
WARNING	Images without alt text	30

Speed and quality (Google Lighthouse)

Page	Performance	Accessibility	Best practices	SEO	Main content shown after	Layout shift
Homepage, mobile	25	96	73	100	39.0 s	0.0
Homepage, desktop	53	100	73	92	8.1 s	0.0
Average of 7 sampled pages, mobile	28	96	73	91		

Google treats “main content shown after” (Largest Contentful Paint) above 2.5 s and layout shift above 0.1 as poor. Slowest sampled pages on mobile: / (25, 39.0 s); /blogs/culture/casual-chats-with-andrew-benin (28, 39.3 s); /blogs/culture (29, 41.9 s).

2. Google rankings

30 keywords checked (United States, English, desktop, top 20 results). Live check on 6 November 2026. Top 5 for brand and product terms; absent for 'best olive oil' and 'extra virgin olive oil'.

5. Action plan

#	Action	Effort	Impact	Owner
1	Create three buying-guide pages that answer 'best olive oil', 'best extra virgin olive oil' and 'olive oil squeeze bottle' directly: comparison table, origin and harvest facts, an FAQ block with schema, linked from the homepage and the top recipes	3–4 days	High	Content + SEO
2	Cut the homepage's mobile load: compress and defer the hero media, audit third-party app scripts (reviews, pop-ups, upsell apps), preload the main image; target a mobile score of 60+	2–4 days	High	Theme developer
3	Fix the 4 broken internal links on the Friendsgiving and Gifting pages, and point the 19 near-identical collection pages (all, bottles, bundles, cans, cart upsells) at one canonical URL	2–3 h	High	Store admin
4	Refresh the how-to articles that sit just outside the top 10 ('tapenade' #11, 33,100/month; 'can I use olive oil instead of vegetable oil' #12, 12,100/month) and add clear Q&A answers for olive oil smoke point (22,200) and seasoning cast iron (40,500)	1–2 days	Medium	Content
5	Add a main heading to the 81 pages without one, descriptions to the 61 pages without one, and alt text on 30 pages (mostly recipe and blog-category pages)	1 day	Medium	Content
6	Protect the AI lead: be quoted in the sources the engines cite most for these questions (aboutoliveoil.org, Consumer Reports, Food & Wine, Food Network, Reddit cooking threads) through testing submissions and expert comment	ongoing	Medium	PR

A weekly re-check against this baseline shows which fixes move rankings and AI mentions.
